

NIHAL PATEL

SOFTWARE ENGINEER

SUMMARY

Software Engineering student with proficiency in Software development with experience in Fullstack, React.js, and web development. I am hungry to learn and looking for opportunities to gain more experience. I have also done projects which have given me experience in frontend and backend development. **NZ Residency**

CODING PROJECTS

Investor Tracker

Creating a web application to React js where any user could make save their current crypto and stock investments and it would tell him the current price and also calculate the profit/loss from the recent price and the information.

Deal Finder

Taking this course alongside University and my project, this project helps you browse through the best deals that are around you all in one place. It was developed in Django as a web application. The project further developed skills I learned in my earlier years of university, as well as learning newer skills and relevant skills such as agile methodology. Leading to collaboration and a greater understanding of how agile concepts are applied in a team.

Chat Bot

Creating a relatvily simple chatbot which can be used to answer frequently asked question in python with deep learning.

WORK HISTORY

OnFinality

Developer Intern

May 2021 - Aug 2021

Flexible Hours, In-office/Remote

- Working at OnFinality an important skill that I had a chance to apply was the Aglie methodology. In my time working there I was working on creating a terraform plugin and work with powershell for a command-line tool and using git to contribute my code to towards the project, I have seen the standard and attention to detail required to develop such code

Fiji Food

Cashier

Mar 2017 - May 2021

Part Time, In Store

- Working part-time at Fiji foods as a cashier and alot of other roles
- Serve 150+ customers a day, while taking the time to give each one my full attention.
- Open and close the till with accuracy and reconcile errors by end of the day.

Kumon

Math Tutor

Oct 2013 - Feb 2017

Twice-a-week, In Class

- Worked as a math tutor at Kumon my job was to measure the progress of students using the benchmark assessments. Communication was very important due to that fact there were more than 20 different students every hour, to ensure they understand the work they had to complete and the parents so they would understand how to support the kids.
